

There's nothing like instant validation

Improve efficiencies and meet your customer requirements with Open Spatial's online, pay-per-service portal.

Online Pay-For-Service Portal makes validating CAD drawings and converting to GIS a snap

The ACDC portal cloud-based service

- » validates As-Constructed and As-Built CAD drawings, and includes required GIS data, using A-SPEC and other data standards;
- » allows multiple QA attempts and includes error markings and other correction messages during the validation process;
- » includes CAD drawing templates, menus and required, predefined attributes;
- » allows seamless creation of projects to upload, share, and deliver as-design and as-constructed document sets that conform to customer data requirements and standards; and
- » allows for Internal drawing review workflow process between team members.

Seamless, accurate, powerful, complete.

Check and deliver as-constructed documents that meet client standards and provide GIS-ready data.

Validate your work anytime 24 hours a day, 7 days a week

Communicate with customers easily and quickly

Open Spatial Geospatial Suite

Open Spatial provides geospatial engineering solutions for managing spatial data from survey through design, construction, and data management. Our technologies are based on risk averse ubiquitous platforms that bridge the gap between CAD, GIS, BIM, and asset management applications. Utilizing open standards and engineering best practices, we deliver fit-for-purpose solutions with a focus on productivity improvements, definable return on investment, and long-term savings.

Edit in AutoCAD Map, Civil 3D, store data in single database; Multi-users, off-the-shelf applications and data models

Web-based, geospatial portal and business intelligences integration platform

Automate the validation and loading of data from electronic submittals of as-builts directly into GIS and CMMS
